NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The flight was scheduled to depart at around 06:50 UTC on the 25th of September. This was supposed to be a 20-minute local sightseeing flight and was the pilot's last flight of the day. Pilot did a routine "Before Takeoff CHECK" prior to taking off, and everything was normal at the moment. After takeoff, they proceeded Two Lovers Point, then Agana Tower gave them an instruction to hold over Tumon Bay in order for other aircraft departures and arrivals at the airport. The pilot complied with the instruction and held over Tumon Bay for about five (5) minutes. They were further instructed to continue westbound, and the pilot turned the airplane around, flying direct to Camel Rock. Everything was working normally until the airplane passed Chamorro Village, on the way to Camel Rock, where the pilot noticed sparks coming out from the left side and smoke was filling up the cabin. The pilot opened the left window to let the smoke out. There was no fire, but the fumes continued to fill up. Shortly after that, airplane's engine lost its power, and whole airplane started shaking violently. Under such circumstances, the pilot decided to head back to the airport and made a May-day call to the Agana Tower, informing them of engine failure. In the meantime, the pilot followed the engine failure emergency procedures, but it failed to restore the engine power. It was performed at some altitude below 1,100 feet indicated. Being in the rush hours, pilot's thoughts were to find a way to minimize damages and ensure the safety of his passengers, himself and those who were on the ground. The pilot's options were limited due to the fact that highways were filled with vehicles and beaches were occupied by people. He tried to fly the airplane back to the airport and to land on one of the runways. However, as they were approaching the airport, the pilot realized that they were too low to reach the runways, and he made his second May-day call, stating they would not be able to make it. He tried to land on a grass area just short of the runways after finding it to be suitable for a safe landing. At the very last moment before landing, he realized there was an airport perimeter fence in front of him and decided to make a left turn to avoid it. Next thing the pilot remembers is the airplane coming to a stop and seeing left fuel tank leakage. The pilot assisted the passengers for the emergency evacuation. They waited for the emergency crews to arrive at the scene.
