Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Nose strut sheared off. Nose wheel bounced between runway and belly of aircraft, puncturing the belly of aircraft twice. One puncture damaged some interior structure. Prop struck runway bending and de-laminating. Engine requires sudden stoppage inspection/replacement.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

07/14/2018 06:00 PDT: I met with my instructor at Rainier Flight service and we went over the Navigation Log I filled for my cross country flight from KRNT -> KBVS & back to KRNT. We talked about my VFR departure at KRNT, cruising speed & altitude, VFR way points, Pattern Entry & Altitude at KBVS etc.. and checked the weather once again to see that it is VFR and in my personal minimums. After my instructor validated my flight plan, he gave me the 2nd solo cross country endorsement for KBVS.

07/14/2018 07:30 PDT: After preflight inspections, getting full fuel, opening my flight plan via online, I departed from KRNT and headed towards KBVS.

07/14/2018 08:25 PDT: I landed at KBVS on R29, Taxied back to Engine Run up area and closed my flight plan. I checked the weather information once again, communicated with my instructor about safe and successful landing at KBVS, I went over the before Takeoff checklist like Mixture Rich, Trim set to T/O etc..

07/14/2018 08:40 PDT: After getting latest weather information (310 @ 5kts) & making sure no traffic in short final or in pattern, I communicated in CTAF about my intentions of departing from R29, rolled from runway numbers for a normal takeoff and downwind departure to south.

Immediately while on Take off roll within few hundred feet, the aircraft started shaking & bouncing, I verified my T/O configuration with Trim and Mixture set properly and executed a engine failure scenario with Throttle Idle, Mixture cutoff, Fuel Cutoff and tried to hold the nose from coming down hard on the ground since the aircraft was airborne due to the ground effect. After few seconds of trying my best to set the aircraft on mains, i touched the nose to the ground only to find out the nose wheel was missing and aircraft came to screeching halt with prop strike on the Tarmac. I called for help & turned off magnetos & master.

07/14/2018 08:45 PDT: After towing the aircraft to parking ramp, i contacted my instructor and told about the incident and met up with my chief instructor later that day to go over this and came back to KRNT.
