Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Off field landing, post crash fire destroyed the aircraft.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Full pre-flight was conducted as well as weather brief. Fuel checked at 60 gallons. All three QD were sumped and free of water/FOD. Oil was at 10 quarts, added one quart to get to 11 quarts.

Flew KTOA to KMYF on unopened VFR flight plan to pick up Stelling's for football game in Los Angeles. Flight was uneventful.

Landed KMYF parked in transient area to pick up the stelling's. Elected not to take on more fuel as over half tanks and only ETE of 45 minutes. Approximately 45G fuel aboard. Performed a walk around, and passenger brief on exits and seatbelts.

Taxi'd to 28R and executed preflight checklist and standard run-up verifying mags, prop, control continuity.

Normal Takeoff from 28R, full power ascent at 95 knots.

Approximately 1.5 miles west at approximately 700 feet AGL (1100 MSL) experienced a sudden and complete engine failure possibly accompanied by a "clacking" sound.

Pitched for airspeed and executed a steep 180 degree turn to the right. During the turn executed the emergency engine out checklist:

1. Switched Tanks.
2. Mixture Rich, throttle full, pitch fast verified
3. Magnetos, L then R, then back to both
4. Aux pump high

Emergency flow was finished at completion of 180 turn, but no engine power. Prop was moved to slow to extend glide performance and airspeed was increased to 110kts. Insufficient remaining altitude to make the field. The 805 freeway looked marginally to be within glide range, but was full of cars in both direction due to time of day. The crash site field was selected as it was within range and relatively free of obstructions.

On downwind (east) to base (south) prop was moved to fast position and gear was extended to add drag and allow steeper descent to field at hand in preparation for landing. Flaps were not selected on the base to final turn due to risk of ballooning or coming up short for the marginal length field.

Stall warning was sounding during maneuvers to avoid wires and other obstacles, potential for accelerated stall and need to retain energy necessitate maintaining airspeed.

Field was made approximately 1/3 to 1/2 of its length. Immediate heavy braking was applied but the aircraft overran the field and collided with a fence and possibly a tree behind the fence, but no tree was observed.

Upon collision an immediate post crash fire was initiated with smoke filling the cabin. The pilot attempted to open the left side emergency exit but the aircraft was buckled in this location. The front right seat occupant (Robert Stelling) was not observed in his seat, but there were tree branches and terrain visible. The door was not passable.

The pilot climbed over the seats into the back and did not observe the right club seat passenger (Mike Zareski) but did observe Dawn Stelling apparently stuck halfway in one of the aft windows. He attempted the rear emergency exit to perhaps exit the vehicle and pull her out but it was blocked. Concerned with the intensity of the fire and level of smoke inside, the pilot shoved Dawn Stelling out through the small broken rear window and followed closely behind her. The aircraft immediately was consumed by a "wall of flame".

Local witnesses were immediately on the scene and any further rescue attempts in the airplane or adjacent house were unsuccessful.

The fire department was on scene in less than 3 minutes.
