OpsVue data is track data only. L3Harris' OpsVue uses NextGen Data which includes flight identification and location. This NextGen Data is a multi-sensor system that aggregates and georeferences FAA data sources including data from FAA Terminal and En Route Radars, the FAA certified ADS-B Network and Flight Plan data from the En Route Automation System. The reported altitude is derived from the reported pressure altitude, adjusted for the local pressure reported with the barometric altimeter. Outside of the CONUS, only pressure altitude is reported. The accuracy of altitude data can vary, sometimes up to several hundred feet, however trend information (ie; rates of climb and descent) is relative and accurate.
