

RECORD OF CONVERSATION

All persons listed were interviewed by Zoë Keliher or the FAA Inspectors

The following is a summary of conversation:

ELIAS JACA

Mr. Jaca stated about 0830 he observed a white plane flying south about 500 ft.

TRAVIS AND RYAN WHITE

About 0830 the witnesses observed a white plane flying south up a draw and cross over an east-west oriented hill. A few minutes later they saw smoke on the other side of the mountain.

A photograph of a piece of lined paper with handwritten notes in blue ink. The text is written in a cursive, slightly slanted style. At the top, there is a line of text that reads "which things took place include the facts of where, when, who, what, why, and how". Below this, the notes are as follows:

9/30/18 0830 Saw white plane flying up
draw flying south then a few minutes later
saw smoke on other side of mtn. Drove
to wreck 0910 find wreck. confirmed
Bodies (3) Stumped on fire + returned to
water testing cabins to call 911. waited for
sheriff

DANNY R. CONLEY

The time is a direct time stamp for the message transmission from the satellite system which received the signal. That time is hard coded into the alert and we have no control over that. The actual detect time for the satellite was 30/1436Z. From the time the beacon is set off till the first data burst is normally set by the manufacturer as 100-110 seconds.
