NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

First thing in the morning myself and the other pilot here at Haley Flying service Jeff, pre-flighted the airplane and got me familiarized with it. We then talked for about a half hour of where some safe areas are to fly where there aren't any power lines, and he also told me about an air strip near by to practice a few landings before I landed back at Haley flying Service.

Once the plane was running for a little while and warmed up, I did my run up and took off. I flew to the other side of the canal and performed some basic turns to get comfortable with how the airplane flew. Once I was comfortable I found an empty field without any field workers or obstacles anywhere near there and I simulated working a field to practice flying the light bar.

After I finished flying the field I flew over to "New Jerusalem" air strip to practice some take offs and landings. I did a touch and go and then two full stop landings and I felt comfortable to come back to Haley strip and land.

Once I flew back to Haley, I over flew the runway to make sure that the runway was clear for me to land. I then flew back around to the east end of the runway, got the plane slowed down and trimmed for landing and made my approach. Once I knew that I had cleared the wires and made the runway I pulled the power back to idle and glided down to the runway. When I was just over the runway I flared the plane and had a very smooth touch down. When I was on my roll out after touch down I felt that I hit a bump that caused me to bounce a little bit and the plane started to go to the left. I tried to correct it with right rudder but I do not think there was enough wind over the rudder to be effective. I then tried to use right brake to bring the plane back but it felt as though the right brake was un effective as well and I continued off the left side of the runway. Once my left main landing gear went off the runway it turned the plane more sideways to the left and then the right main gear caught in the dirt and broke off. I then slid up to the embankment next to the ditch and the impact killed the engine. I quickly shut the fuel off, turned off all of the electrical and climbed out of the airplane.
