

NATIONAL TRANSPORTATION SAFETY BOARD

PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Nipton State: Ca
 ZIP: _____ Country: USA
 Latitude: 35.413056 Longitude: -115.761944
(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 11/16/17 Local Time: 5:55
mm/dd/yyyy Time Zone: Pacific

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N5966V
 Manufacturer: Piper
 Model: Arrow III
 Serial Number: 28R-7703172
 Year of Manufacture: 1977
 Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: P28R-201T

☒ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

Maximum Gross Weight: 2912 lbs
 Weight at Time of Accident/Incident: 2500 lbs
 Number of Seats: 4 Flight Crew Seats: 1
 Cabin Crew Seats: 0 Passenger Seats: 3
 Number of Engines: 1

☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop was destroyed, Engine damage unknown, nose wheel collapsed, wing damage to both wings, right main gear collapsed and strut forced through wing.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departure from KVGT was at 16:55 local for IFR from KVGT to KPOC. Clearance was obtained prior to engine start and pre-flight inspection was completed with no exceptions. Takeoff was uneventful. Winds favored RWY 25 and established a quartering head wind from the left. Climb-out was via the KVGT Northtown 4 SID to the initial cleared altitude of 7000 (seven thousand) feet. Climb out had some variation in rate of climb but did not appear significant and attributed to up/down drafts. Turbulence was light chop up through 7000 (seven thousand) feet and smoothed out around 8500 (eighty-five hundred) feet. All engine indications were normal during ascent. Las Vegas Departure provided vectoring before being cleared direct to CRESO intersection and to climb and maintain 10000 (ten thousand) feet. CRESO was not loaded into the original flight plan so the direct request was delayed slightly while pilot entered way-point into flight-plan. En-route to CRESO pilot requested direct to HECTOR VOR after CRESO and was approved. Once established on airway pilot began leaning procedure using on-board engine monitor (JPI-700). Procedure was routine and uneventful (Established cruise setting and allowed to stabilize for approximately 1 minute, Started JPI routine to find leanest cylinder and was successful, pilot enriched mixture to provide approximately an 80 degree rich of peak setting, Verified oil temperature and pressure and no unusual indications and noted a fuel flow of approximately 13.5/14 GPH per the panel fuel flow gauge). Flight continued for approximately 5 (five) minutes at which time pilot and passenger both noted an abrupt engine roughness seemingly focused on right side. Pilot noted that JPI indicated cylinder number 5 (five) CHT (cylinder head temperature) was spiked (highest possible graduated mark available). Aircraft started slowing and pilot noted inability to maintain altitude. During descent to maintain an acceptable airspeed pilot went through GUMPS check. A slight acrid odor permeated the cockpit for about a minute and then dissipated. Electrical fuel pump was unlatched and set to high. Pilot allowed sufficient time verify any difference in performance and noted no change. Pilot switched tanks and noted no difference to performance. Aircraft had lost approximately 500 feet in altitude at the point that contact by ATC was made for low altitude alert and pilot advised of engine trouble. ATC advised that Baker airport (002) was approximately 26 miles to the west and asked if able to make it. Other aircraft on frequency offered that they were unsure of the availability of lighting at Baker (002). Pilot was unable to verify lighting availability. Distance to Baker (002) was determined unacceptable in addition to moonless night conditions would have made terrain and obstacle avoidance nearly impossible. Based on visual conditions the 15 freeway was determined the safest landing point. Pilot advised ATC of intentions to land on the 15 freeway. Pilot established best glide rate to touchdown point on west bound traffic side of freeway based on traffic flow and knowing that time of week would mean lighter flow out of Las Vegas. Gear was extended and 0 degree flap setting was maintained to assure sufficient air-speed to avoid inadvertent stalling. During descent it was noted that prop appeared to be still turning but did not "feel" like producing power to regain altitude and was the reasoning of keeping the throttle, prop and mixture full forward during the descent at the time. Terrain elevation was unknown to pilot and visual orientation was maintained with traffic flow to adjust for any gaps in traffic. Prior to touchdown the 430 annunciator a low altitude alert which allowed a further arresting of descent to minimize vertical descent into terrain. Pilot had no horizontal or vertical references due to moonless night conditions and effort focused on maintaining a wings level attitude at touchdown. Touchdown was hard and visual reference was inhibited by dust, vibration and moonless night conditions. Directional authority was available during roll-out and maintained. Aircraft remained upright during roll-out. After aircraft came to a complete stop, verification was made that there were no severe injuries to passenger or pilot and exiting the aircraft was immediate.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

In regards to the specific events while considering the visual conditions at the time, nothing could have been done to improve the outcome.
However, I would like to mention that the controllers cooperation in negotiating on my behalf with the next controller (LA Center) to go direct Hector was instrumental in the positive outcome. It kept from going further south into more rugged terrain (original FP was over GOFFS VOR). I myself will be applying this in any future flying. Just like its more then one thing that brings airplanes down the same could be said in the reverse. I think kudo's deserved to be shared all the way around.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)**Was there Mechanical Malfunction/Failure?** ☒ Yes ☐ No*(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)*

Teledyne/Continental Engine Model #TSIO-360-FB-1, Serial Number 248100-R, Loss of Engine Power

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

Under separate e-mail FAA Principal Maintenance inspector Carey L. Atnip requested the following information:

Did pilot attend safety seminar or clinic within the past two years ? NO.
Did pilot participate in wings program within the past two years ? NO.
Did pilot attend any air carrier initial training within the past two years ? NO.
Did pilot attend any air carrier recurrent training within the past two years ? NO.
Did pilot attend any air carrier re-qualification training within the past two years ? NO.
Did pilot attend transition training within the past two years ? NO.
Did pilot attend simulator training within the past two years ? NO.
Did pilot attend COMM/Third party training within the past two years ? NO.
Did pilot attend any other training within the past two years ? NO.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
