Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Right landing gear broken off, right wing and flap bend/broken.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Normal preflight including weight and balance, weather checks. visual check for fuel and dipped tanks checking oil control surfaces etc. started, turned avionics on and received ATIS, called clearance delivery for VFR to Hawthorn with flight following, called ground for clearance to taxi. taxied to 16L via Charlie to run-up area for 16L. went through checklist for "before takeoff", normal run-up at 2000 rpm first leaning engine due to altitude airport, leaned 25-50 degrees rich of peak. checked mags (about 100 rpm drop on both L&R) all engine instrument, set all flight instruments, 10 degrees of flaps, verified left main fuel selection and turned on axillary fuel pump. Called tower ready for takeoff, tower cleared us for takeoff on 16L at approximately 15:20 PST. rolled out to runway checking approach path for traffic turned on to centerline and applied power, normal acceleration to takeoff speed rotated and lifted off. At approximately 300 feet the engine stopped running, appeared to be total ignition failure. there was no sputtering like being starved for fuel, it just stopped firing. We attempted to make side step to 16R but there was not enough runway to make it, continued turn crossing runway "25" but did not have time/altitude to get there, there was stall warner we put the nose down and used the airspeed left to lessen the impact. We hit the ground between I believe taxiway A and B in the gravel slid over taxiway B and came to rest in the gravel between taxiways A/B. The right fixed landing gear broke of and ended up about 100 yards to the south west of the plane.
