830 AZ

April 14, 2018

Completed preflight walk around and inspections including oil level and sampling fuel from gascolator.

7:47 AM topped off fuel tanks at Corona Airport self service fuel depot. Took on one and a half gallons 100LL. Both left and right tanks full to capacity – 12 gallons each.

7:51 AM Departed corona municipal airport (AJO), flying solo, planned destination: sierras north of Kern Valley airport. I was flying with two other pilots in their aircraft as a flight of three. Flying time approximately two hours 20 minutes. Landed on private dirt strip approximately 20 miles north of Kern Valley Airport.

12:49 PM Departed private dirt strip, planned destination Tehachapi airport (TSP). Approximately 15 minutes after take off engine failed. Altitude at failure 7000 to 7500 feet, 2000 to 2500 feet AGL. No alarms or unusual sounds preceded the failure. Engine did not sputter or backfire. Engine did not cease, it wound down.

Immediately began emergency procedures including switching on auxiliary fuel pump and switching from right fuel tank to left fuel tank while attempting to restart. I was able to hear the fuel pumps making their normal "buzzing" sound. At time of failure I estimate there were at least 3 gallons in the left tank and 8 gallons in the right tank. Engine cranked over normally when attempting to restart, but no hint of motor starting.

When the engine failed, I made the determination that the terrain behind me was "friendlier" than the terrain in front of me. Turned 180° around. Ultimately put the aircraft down in rough terrain within the Sequoia national Forest. Aircraft did not break up. I sustained only very minor injuries.
