Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

DAMAGE TO SKID LANDING GEAR, FUSELAGE, TAILBOOM AND TAIL ROTOR

PROPERTY DAMAGE MINOR, SMALL AMOUNT OF DIRT TURNED UP IN FARM PASTURE DUE TO LANDING

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We were in cruise flight patrolling the transmission power lines flying along the right side at roughly mid conductor level between 35 and 40 knots ground speed (Observer estimated later that we were roughly 120 ft above the ground). I was having a conversation with my observer and I heard the engine RPM start to reduce. I looked towards the instrument panel and at that time when the Low Rotor RPM light and audio came on. I lowered collective and verified throttle full open. I increased Governor switch to increase and that did not fix the situation. I immediately scanned for a landing spot. Ahead and left was flatter but had the transmission power line overhead. There was a farm pasture with a flat spot on top of a small hill in front of us and slightly to the right. I noted small distribution power line in front of and perpendicular to us. It looked like I could reach the pasture. I had to use rotor RPM to clear the distribution power line to make the pasture. I realized we would not make the flat spot on top of the hill and we were going to land on the incline of the hill. I flared and went to cushion the landing but there was not enough rotor RPM left and we landed hard. After we landed I rolled the throttle to idle cutoff (the engine was still running to some degree). I shut off the Fuel Valve switch and then turned off the battery switch. I applied the rotor brake to stop the blades. We asked each other how the other one was. Both of us said our backs hurt but otherwise ok. We both exited through our doors. I checked for fuel leaks and did not smell or see any leaks. I disconnected the aircraft battery to further secure the helicopter.

The helicopter landed on an incline in a farm pasture.

Aircraft wreckage contained and not spread out more than a few feet.

Departed KIMS Madison Municipal Airport, IN at 12:05. We topped off with Jet A at Madison Municipal. Destination was off site in Mount Orab, OH.
