Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Substantial damage to rotor blades, rotor head, fuselage, keel tube, propeller. Main landing gear separated from aircraft.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Plan for flight was to remain in pattern at KTIW in order to practice takeoffs and landings. After cleaning and preflight of aircraft in the hangar, we taxied to self-serve fuel pump located on the ramp. Ten gallons of fuel was added. Next we proceeded to north ramp and performed pre-takeoff and runup checklist. Once complete, I contacted ground control to request taxi to runway for touch and goes. After holding short at Runway 17, we were cleared for takeoff with left closed traffic. We taxied into position on the runway and began take off procedure checklist. I was unable to prerotate the rotor to 200 rotor RPM as required. Controller indicated that we were taking a long time on the runway. I requested that we return to the ramp. Upon return to the ramp, I applied parking break and proceeded to test pre-rotator. This time, it appeared to be working normally. Accordingly, I contacted tower and requested another take off clearance. After holding short several minutes for landing traffic, we were cleared for takeoff. Once in position, I again performed the takeoff checklist. This time, I was able to pre-rotate to 200 rotor RPM. I do not remember exactly what happened after this. I remember being in the air (approximately 10 feet) and feeling a strong vibration. My next memory is of the aircraft sliding on its left side through the dirt and grass then coming to a stop. I then located the emergency egress hammer, but just as I was preparing to enlarge the hole in the canopy glass, an eyewitness arrived and assisted us in getting out of the aircraft.
