Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft was damaged from the impact after flipping; nose gear was ripped out, left main missing, nose spinner smashed, aircraft appeared tweaked upon exiting the aircraft.

The resulting fire burned a large portion of the airframe from forward of the N number. The wings had some fire damage.
(Attached in email are post burn photos)

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed KEUL for KONO around 1620 MST. Uneventful flight until final. During a straight in approach I lost power to my engine. I attempted to restart, but had no time. The wheat field ahead was the best option to make my emergency landing to avoid power-lines/structures. I made a landing in the first field. I could not see the ditch/drop off from the air. Upon hitting the ditch the aircraft flipped. The aircraft was on fire upon me exiting the aircraft.

I called 911 after evac. Before Ontario Fire & Rescue or the EMTs arrived, the airframe was engulfed in fire. I was transported to the hospital and released with minor injuries.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The training I received was crucial in saving my life. If the ditch was not there, the aircraft would have not sustained damage.
