Departure: KOGD Destination: KPNA, then to my friends' ranch just north of KPNA		
My friend (Wayne Grant) and I were planning our flights to another friends ranch (Dave Durbano), just north of Pinedale, WY, with a planned top-off fuel stop at KPNA. I was bringing Dave his XCub (N70DD) and Wayne was following along in a Husky.		
Preparation / Departure:		
We planned the flight a couple of days prior. The plan was to meet at Dave Durbano's hangar at KOGD at 0800 to fuel both aircraft. I was a few minutes late (3-5 min) because I stopped at my family's hangar to grab the survival gear bag to put in the Husky. Wayne was already at Durbano's hangar when I arrived. I called for fuel (CB Aviation) and mentioned there would be two aircraft needing to be fueled; the Husky and XCub. As I began opening the large hangar door, the cable snapped and broke the hangar door. We were able to get the XCub out of Dave's hangar, even though it was only halfway open. The fuel truck showed up and asked how much fuel. I checked the site gauge of the XCub and realized it was full. We topped off the Husky and I acknowledged we didn't need fuel in the XCub. My focus then diverted back to the hangar door, until I received a phone call from my work. I finished the conversation and was a bit concerned with the door (It's very large). I took pictures on my phone of the actual door needing repair, along with the manufacturer repair phone number, so I could let Dave know when we got to his ranch. As the fuel truck finished up with the Husky, I preflighted the XCub and decided to slowly get the door lowered electronically. We were on our way; albeit, a bit late. As I went to start the XCub, the battery was dead. I then got out and signaled to Wayne to shutdown the Husky he was flying. I was able to quick-charge the Battery with an external battery charger, which had quick-charging capability. After completing the charge, I secured the aft battery compartment and we were finally on our way. The airplane started without any anomalies. I taxied to the North Ramp (Uncontrolled Area) and did my Before Takeoff Checklist. I heard Wayne on the radio alerting Tower he was ready for an intersection departure D / Rwy 3 for a North Ogden Canyon Departure, just as we had discussed. I followed a few minutes later. Wayne and I had discussed staying within site of each other, along with transmitting with one-another on 27.85. After leaving KOGD Class D airspace, Wayne and I established communication on 27.85 and I was in-trail and had him in-site the entire flight.		
Accident:		
After ~:45 to :50 minutes enroute, and at a location approximately 41.61N / 111.46W my engine began to cease. I immediately transmitted to Wayne I had lost my engine. I noted airspeed of ~80 kts but diminishing quickly. I immediately hit the fuel pump and got a slight boost, set flaps 1, but was then followed by a complete power loss. I pitched for ~60 kts, which is what the A/C was indicating. I chose my landing site and as I was descending I realized I wasn't going to make it. I pulled full flaps and pitched down towards my second-choice option. As I was approaching the ground, I had to use left rudder to prevent hitting a tree head-on. The left wing hit this tree and from there I remember flaring momentarily. I blacked out for a few seconds, but feel I came to rather quickly. I started hitting electrical off but noted no smoke. I was concerned with trying to exit the aircraft but then realized the significance of the injury to my left foot (Broken and compounded). I tried to compose myself by performing a self-evaluation of my injuries. I knew my face was badly injured but didn't know the extent. My backpack, along with bottled water/snacks, was secured in the aft seat. I was able to get this and drink a little water. I heard Wayne continuing to circle above me. With no smoke, I unsuccessfully thought I'd try to see if the radio worked so I could let Wayne know I was alive but badly injured (He was circling above me). I slowly managed to crawl out of the airplane and support myself on the main wing struts, with my leg elevated on the seat. I tried waving to Wayne but wasn't sure if he could see me because I was under the wing. I didn't want to leave my position because I was shaded and hydrating with water; along with my leg being elevated. Eventually, LifeFlight arrived and loaded me into their helicopter. I was coherent and provided them two individuals to call (My father and brother).		

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Pilot Safety Recommendation/Actions:

Chain-of-Event training

Strict guidance to following Checklists (I did check the fuel site gauge but did not utilize the dipstick over-the-wing check)

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Flight times listed above are approximate. I'll update upon receiving up-to-date flight times from current employer (I fly professionally for Keystone Aviation, based at KSLC).

August 17, 2018 Additional Information: Interior Preflight Actions

After having a telephone con-call with Mr. Joshua Cawthra yesterday, he requested I include my interior preflight actions as Additional Information.

As mentioned in my initial 6120 submittal, I completed my preflight actions of both interior and exterior. My typical interior preflight actions consist of "touching" each knob, bezel, toggle, circuit breaker, lever, etc.; but not limited to, in a flow-pattern. Whether flying solo or flight instructing, the aforementioned is my typical way of completing or teaching interior checklist items; then backing those items up by use of the Aircraft Checklist. In regards to Mr. Cawthra's specific question about whether or not I visually inspected the fuel sight gauges, I specifically remember looking at the fuel sight gauges and seeing them at maximum capacity.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
