Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft suffered from hard landing. Flames started in cockpit area. Aircraft was destroyed in fire.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Took off from the loading spot around 10am located on the south west side of the field with 60 gallons of clean water and around 25 gallons of fuel, sprayed a portion of the field on the north end for about 3-4 seconds and turned off my spray and made my way to the east end of the field, entered the field around 50-55 mph and sprayed. Turned off spray and came up and gained altitude prior to the end of the field at about halfway through the field around 50 mph, at that time I also applied left peddle as I was coming out of the field and about power pole height I slightly lowered collective to assist in looking left, to take a look at the spray to double check that it was not drifting near the grass air strip that is directly east of the field. Immediately after apply left peddle and slightly lowering collective the helicopter turned left fast and was facing north with a shaking feeling. Immediately realizing the helicopter was yawing to far left I pulled slight up collective and applied right peddle to stop the left yaw and now I was facing north east with a shudder and low airspeed throughout the helicopter and descending. I nosed the helicopter forward slightly to regain airspeed, at about 5-10 feet above the ground I pulled aft cyclic and then went forward cyclic to level the helicopter before the skids touched the ground. As i was going forward with the cyclic the torque gauge was reading 108-110 percent

One second or after hitting the ground fire was in the cockpit and I unbuckled and got out, immediately after getting out I reached back in to verify I move the throttle to the closed position and flipped the fuel valve off, grabbed my phone from between the front seats and got away from the helicopter. From the time i came out of the field and the helicopter was on the ground was about 10-15 seconds

Intention was to finish spraying my rinse load at that field and then fly back to the basin city hanger 97WA.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Pilots participated in re-training of unusual operations low level operations and settling with power in low level operations. Accident could have been prevented by maintaining coordinated flight and airspeed.
