Re: Gear speed? N255 WPR18LA215

Thursday, October 3, 2019 7:35:50 PM

Michael

N255 was slowed below 140 mph to my best recollection. Our AFF (automatic flight following) with Spidertracks indicates the aircraft was at 128 knots when the gear was attempted to be lowered. If you would like a picture of the tracking I would be happy to provide one. Hope this helps and all is well.

Thanks,

Jim Page

I don't have it in my notes or any other docs

Can you please confirm that you initially extended the gear below the max gear extension speed (160 mph)
