Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Significant damage to all 4 wing struts from impact with fence posts.
Right wing and aileron have damage from impact with the top of a fence post at the mid aileron attach point.
Underside of left wing has 12'-14" tear in fabric caused by impact with fence post.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My wife and I planned a trip in May that included flying to the Flying B Ranch (1210) for breakfast and then a short flight to Big Creek (460), spend the night at Big Creek Lodge and return home the next day. Our reservation at the lodge was for August 1st and we departed Mineral County airport (954) that morning at 0820 and landed at the Flying B Ranch at 1005. We ate breakfast and departed 1136, arriving over Big Creek at 1210. I made a circling approach, determined from the wind sock that the wind was calm, and entered left downwind to the recommended runway, 19. The approach was normal and we touched down at approximately 55 MPH. Power remained at idle and as the aircraft slowed below 40 MPH I applied full aft control stick to pin the tail wheel and retracted the flaps. I then applied the wheel brakes with equal pressure and the aircraft immediately turned left approximately 40°. I released pressure on both brake pedals and tried to regain directional control, first with right rudder and then right brake. We continued forward at approximately 40° from the runway centerline for several hundred feet, running over an irrigation pipe, impacting wooden fence posts, and into a large willow bush. From the time I lost directional control until we stopped was 4-5 seconds. Neither my wife nor I were injured and we were able to exit the aircraft in a normal manner through the door on the right side.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I have spent countless hours going over events in my mind trying to answer this question and have not been able to determine how the accident could have been prevented.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Possible brake malfunction.
