Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

BENT NOSE GEAR LEG, PROPELLER, ENGINE MOUNT, ENGINE
COWLING CRACKLES, RUDDER TOP BENT

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I left Nampa (KMAN) about 7:40 A.M. I flew to Johnson Creek (3U2) and landed. I took off Johnson Creek and flew to Reed (ID92) about 10:00 A.M. I flew a normal pattern at 5100 feet. I flew a normal approach. After touchdown, I rolled approximately 130 feet, slowing down. Then I encountered a soft undulation on the airstrip. The nose gear caught, causing the nose gear leg to bend back. The castoring nosewheel frame dug into the dirt for about 30 feet. Then the aircraft flipped over, coming to rest inverted. The aircraft remained intact. There was no fire. The composite propeller and cowling were damaged. The wing struts and rudder were bent. The nose gear leg attachment to the engine mount was bent and broken. Weather was not a factor. The accident happened at about 10:15 A.M.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I think three major factors combined to contribute to this accident. First, this was my first attempt landing at this airstrip. I have landed at other turf and dirt airstrips. But I think more experience could have helped me be more aware of the hazards. Second, I think the uneven surface of the turf/ dirt airstrip contributed to the accident. Third, the aircraft design was a factor. A 5 inch nose wheel aircraft is more prone to damage on rough airstrips.
