

RECORD OF CONVERSATION

Joshua D. Cawthra
Senior Aviation Accident Investigator
Western Pacific Region

Date: 5/18/2019
Person Contacted: Warren Olgivy
NTSB Accident Number: WPR19FA46

Narrative:

During a telephone conversation with Mr. Olgivy, he reported that he saw the pilot fly into his ranch that morning and walked over to talk to him. A few minutes later, they walked about 200 yards to the club house on his ranch. Mr. Olgivy stated that the wind started picking up, and the pilot decided to head home. During the walk back to the airplane from the club house, about halfway, the pilot set down on a bench, and told Mr. Olgivy that he was "kind of tired today." A few minutes later, Mr. Olgivy and the pilot walked to the airplane, where he watched the pilot board the airplane, taxi out, and takeoff normally. Mr. Olgivy stated that the pilot did not appear to be sick at any time during their talks that day.
