

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Salinas, State: CA

ZIP: 93908 Country: United States

Latitude: _____ Longitude: _____

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 10/06/2018 Local Time: 1830
mm/dd/yyyy

Time Zone: Pacific

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N611TH

Manufacturer: Robinson Helicopter Company

Model: R44 II

Serial Number: 12344

Year of Manufacture: 2008

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

- ☐ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

Maximum Gross Weight: 2500 lbs

Weight at Time of Accident/Incident: 2013 lbs

Number of Seats: 4 Flight Crew Seats: 0

Cabin Crew Seats: 1 Passenger Seats: 3

Number of Engines: 1

Category of Aircraft

- ☐ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☒ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Rotor blade hit Vertical and severed tail boom at landing due to hard landing.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On October 6th, 2018 I planned to fly from KSNS to KPRB. The local time of departure was approximately 6:00pm (1800 local). The aircraft was pre-flight inspected before start up and before take off. There were no signs that indicated unsafe conditions. All of my equipment and gauges related to the Aircraft performance were normal. I also briefed weather through ATIS information and communicated with Tower before take off. I requested a present position departure from Airmotive Specialties off Taxi way Charlie - parallel to runway 26 to the West for a left turn out to the South. My request was approved by Tower. I took off as planned and began to climb. As soon as I transitioned upwind to crosswind for a left turn out to the South, I experienced immediate low rotor speed, loss of power and left yaw... I was approximately 600ft MSL Indicated. I attempted to roll throttle up to regain RPM, but both engine and rotor RPM continued dropping rapidly... enough to signal my low engine and rotor rpm horn and below... so I followed Robinsons emergency landing procedure and lowered collective immediately to regain and maintain rotor RPM. The low rpm horn, loss of rotor speed and loss of power was enough signal for me to engage in an autorotation. All of my signals occurred directly over the city. I was able to find an agricultural field 2.5 miles South... although my descend was rapid and quick. As soon as I got to approximately 50ft AGL, I began my cyclic flare and reduced my descent and most of my forward speed. Just before landing, I raised my collective to allow cushion landing. I landed in a soft, sticky and deep soil. Upon impact, after the helicopter landed/came in contact with surface, the rotor blade hit vertical and severed tail boom at landing due to hard landing. The forward speed and momentum upon impact caused aircraft to shift forward and then back/cradle... resulting in main rotor to come in contact with tail boom. After landing, I immediately shut down helicopter and notified tower that I was down due to a unidentified malfunction. Most importantly... I informed Tower that I was not injured and I requested time time to assess the

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Not been determined.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

Also, on July 25th, 2018 I experienced the same malfunctions twice on same day with higher altitude (low rotor speed, loss of power, exactly what was mentioned above) when I was coming back from KPRB Southbound. Both times I was able to get the Aircraft down safely and shortly after both incident's, specialists were quick to asses. There was no damage to Aircraft. The helicopter was hauled to Airmotive from KPRB and assessed. Immediate attention was taken and the helicopter went under review. Robinson was notified and certain Inspections were done before Aircraft was tested and back in flight.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
