Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Damaged fence, irrigation pipe. Aircraft right wing off, collapsed gear (3), substantial damage to all areas of aircraft.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Intended flight from 1L8 to SLC, weather checked, aircraft fueled with 60 gals 100LL. Departing 1L8 at approx. 1200 on Oct. 21st. VFR conditions with intention of using flight following services from LA Ctr and SLC Ctr enroute. Pre-flight and run-up completed, departed Runway 01 using short field technique, 20 degrees flaps. Normal acceleration and lift off at 79 kts, gear up at approx. 50' agl, flaps to 10 degrees, flaps up at approx. 95 kts. Turned to a heading of approx. 340 degrees. Normal climb performance to approx. 1000' agl, power reduced to 35" MAP, mixture leaned to 35 gph. Immediately noticed the smell of smoke and burning, approx. 5 seconds later smoke is visible in the cockpit. Noticed a Hydraulic Pump CAS msg come on, determined that smoke may be from the hydraulic pump continuing to operate and burning itself. I selected gear down to stop the hydraulic pump from continuing to operate. Noticed 2 main gear lights illuminate and no nose gear light. Simultaneously started left turn back to 1L8. Smoke continued to build in the cockpit and cabin. During the left turn a loud engine noise was heard, oil pressure dropped to approx. 54 psi and wavered to zero. Engine stopped producing power abruptly. Completed the turn towards 1L8 and maintained 90 kts airspeed in descent. Approx. 15 seconds later determined that gliding back to 1L8 was not achievable. Searched for an emergency landing location, visibility continued to decrease. Terrain in the area is rough desert terrain, gullies, hills and the town development (houses, barns, etc.) . At approx. 400 agl I identified a small green plowed field and made a shallow right turn to line up. Increased the descent rate to make the field landing. Attempted to arrest the sink rate prior to impact. Aircraft struck the top of a small orchard tree, light metal fence and heavy irrigation pipe on and immediately after impact. The right wing was torn from the aircraft at the wing root. Aircraft slid into the plowed field for approx. 125 feet and stopped right side up, facing opposite the direction of travel, all three gear collapsed. Noticed fire coming from the engine cowl and also a bush approx. 100 feet in front of the aircraft. Rear passenger opened the top cabin exit door and all occupants exited the aircraft and moved approx. 200 feet away to the opposite end of the field. The land owner, fire dept and ambulance services arrived.

Recorded statement also provided.
