Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Tail rotor backplate (along with associated weights and attachment bolts) had completely separated from one Tail Rotor (T/R) blade, and a dent approximately 6" in length and 1/4" deep (at its deepest) was discovered on the leading edge of the other T/R blade, located roughly mid span.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in-ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At 1104 HST, Helicopter N430ST was at approximately N19.54'02" W156.06'58" transitioning offshore in Class E airspace outside of the PHKO Class D airspace at 1350' MSL and 125 KIAS on a heading of 165 degrees, en route to fly counter-clockwise around the Big Island.

With autopilot engaged and a commanded climb to 1500' MSL in progress, the PIC experienced a loud thump, immediately followed by a medium-to-high frequency vibration of significant amplitude. The PIC was on the controls, and felt the vibration more through the airframe than through the flight controls. The PIC elected to conduct a precautionary landing to the Kilo Ramp at Kona, and landed safely on Pad 3 of the Paradise flight line at 1111 HST. When the throttles were reduced to idle as part of the shutdown checklist, the vibrations increased in amplitude. A normal shutdown was accomplished without further issue.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

Manufacture defect. Should be reconciled at the manufacture level as evidence and maintenance checks would not allow identification of separation from occurring.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
