

RECORD OF CONVERSATION

Debra Eckrote
Regional Chief
Western Pacific Region

Date: 1/4/19
Person: John Antonick
NTSB Accident Number: WPR19LA055

Narrative:

During a telephone conversation, Mr. Antonick reported that he was heading northbound on River Road that runs parallel to the Missouri River on the west side. He observed the airplane at a low-level flying in a westerly direction over the holding ponds, then make a sharp left turn (southerly) over the river. Mr. Antonick estimated that the airplane was about 15 – 20 ft above the water level. The airplane was so low that he lost sight of it as it was lower than the river bank. He believed the time to be about 1615. He said the airplane appeared to be in control, just very low. There was no smoke and no indication to him that the airplane was in any trouble.

Mr. Antonick reported that he is a commercial pilot.
