

RECORD OF EXAMINATION (fuel system/selector position)

Date/time:	April 3, 2019 0800 – 1530 (mst)
Aircraft:	N254PM, Dennis L. Zumwalt Sky Bolt
Location:	Air Transport, Phoenix, Arizona
Subject:	WPR19LA101 examination of fuel system/fuel selector position

On this day the, under the supervision of the NTSB IIC, a Lycoming Engines Senior Air Safety Investigator examined the fuel system relative to the position of the fuel selector, which has OFF, MAIN and AUX selection positions. The results of the examination revealed that the investigator was able to blow air from the Aux tank (wing) line through the fuel selector and gascolator, which confirmed that the fuel selector was in the Aux/wing tank position..
