Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

The aircraft was totally destroyed after the tree holding it was cut down to facilitate its removal from the site by helicopter

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed Castle Creek Ranch around 7pm on the 22nd of April en route to McCall (KMYL). VFR conditions prevailed both at departure and destination. I began a cruise decent 10 miles east of McCall from an altitude of 10,000 ft. Shortly after reducing power the engine continued to run but did not respond to throttle input. I began trouble shooting by switching the gas selector to every position, adjusting mixture, checking for carburetor icing, magnetos ect. to no avail. By this time I had to concentrate on flying the plane. It was apparent by this time that there was no acceptable place to land with tall trees in every direction. I concentrated on maintaining air speed to prevent stalling and basically from there flew into the top of a white pine tree about 60-70 ft above the ground. The time of impact was about 8 pm. Distance from KMYL was 4.2 miles east of the airport. I was not injured and was repelled down from the tree approximately 3 hours later by members of the McCall fire department. ELT did activate on impact. I was able to SOS using my SPOT and was able to issue a Mavdav call on my radio on 121.5.
