Description of Damage to Aircraft and Other Property (use additional sheet if necessary)

Left landing gear leg broke off at fuselage gear box and folded under the fuselage, causing damage to the bottom of fuselage. Left wing bent upward at about the middle of the left aileron. Propeller struck the ground bending a propeller blade forward a few inches. one elevator sustained some damage to the outboard end. There was no other property damage.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

I departed from Lubbock, TX (KLBB) morning of 5/22/2019 in route to Payson, AZ to visit friends, and watch for good weather to return home to St. Maries, ID (s72). In route I experienced some light turbulence at about 8000'. On approach to Socorro, NM (KONM) for fuel, I listened to the AWOS, approximately at 9:55 am MST, winds were calm, density altitude was around 6000 msl. Called Unicom, no reply. Entered pattern made left traffic for runway 33, got lined up on the runway at about 65-75 airspeed over the numbers, and in retrospect as I started to descend to flair I believe my lift diminished quickly and the aircraft came down fast, and bounced, so kept the yoke back and the aircraft settled down and started to veer to the right. I applied left rudder and brakes. The left brake went all the way down, I wonder now if the sudden drop and bounce may have broke the flex hose brake line at the brake caliper or line fitting? The aircraft went off the runway to the right. During the runway exit and ground loop the left gear leg broke off and folded under the fuselage. The left wing hit the ground, and the prop sliced through the dirt and damaged a blade. When the aircraft stopped moving I shut off the fuel, master switch and mags, got out of the aircraft. I was the only occupant. There was no fire. There was no property damage outside. Upon exiting the aircraft, the wind had started to pick up and was blowing quite brisk by the time the Sheriff arrived. I am not sure if the wind may have started to pick up or a gust may have affected my landing. When I switched from AWOS to Unicom.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Windssocks at both approach ends of runways that are prone to have wind gusts at some times.

Narrative:

During a telephone conversation with Mr. Gravestock he reported that he accidentally forgot to adjust his watch during the flight to reflect the time zone change. Therefore, he needed to make the following corrections to the NTSB Pilot/Operator 6120.1 Form:

- Page 3: Basic Information, local time should be 915am MDT
- Page 5: Flight Itinerary Information, departure time should be 730am CDT
- Page 6: Weather Information at the Accident/Incident site, Weather Observation Facility, Observation time should be about 0857 MDT.

END.
