Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Nose gear sheared off - Prop damage - Nose section (cowling) damage and both wings damaged.

No property damage.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Aircraft belonged to my brother in law who passed away at Sulphur Creek Ranch from a heart attack while hiking with my sister on the afternoon before the accident. On the morning of July 14 we planned (my sister a grandson & I) to fly from Sulphur Creek Ranch to our home in Wyoming with a fuel stop at Driggs ID. Departure was planned for 6:30 local time. After loading and a normal preflight the engine was started and run for about 7 or 8 minutes before taxi to take off position. A normal runup was performed with no abnormalities noted. Take off was into a rising sun and when about 75 ft agl engine smoothly lost all power. The nose was immediately lowered and aircraft landed straight ahead on rough terrain. After rolling about 75 yards aircraft impacted thick willows and soft ground with a hole about 4 ft x 4 ft and 1 1/2 ft deep. Hole sheared off nose wheel and aircraft nosed over coming to rest on its back in the willows. There were no injured and everyone exited aircraft through pilots door. Aircraft substantially damaged but intact except for nose gear which was laying about 6 ft in front of prop spinner.
