Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The aircraft was conducting an aerial survey of noxious weed species in an area that had been previously burned by wildfire. The survey area encompassed approximately 170,000 acres and was located in the Southern Missouri River Breaks located NW of Jordan, MT. The crew had concluded the daily survey mission and at 13:50 Mountain Time the aircraft landed at a remote refueling location. Severe thunderstorms were forecast that night so prior arrangements had been made to park the aircraft at a private ranch where the aircraft could be placed indoors. After refueling the aircraft to approximately 58 gallons of jet A and a short break the pilot and two observers departed the refueling location at 14:07 bound for the ranch destination which was located 15 miles to the south.

At 14:27 the aircraft arrived at the intended destination and was preparing to land. The aircraft was on short final to the touchdown spot and at an altitude of approximately 20 feet agl, for unknown reasons the aircraft drifted 100 yards to the right and settled towards the ground. The rotor blades stuck an empty fuel storage tank on the ground next to a large concrete pit that was used to store livestock feed as well as the concrete wall of the pit. The main rotor system and mast broke free at the transmission and came to rest approximately 20 feet from the main wreckage. The aircraft impacted the ground hard in a level attitude.
