Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left wing, left landing gear, nose-gear.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed Anacortes, WA (74S). Monday morning, August 19 around 9:00am local time and flew on an IFR clearance to Felts Field (KSFF).

Upon entering the downwind at KFSS, I asked for a "wind check" as I always do before landing to know the crosswind component. I recall it being about 20 degrees off the nose at about 4-6 knots.

The approach was normal as was the landing. I touched down on the main gear. Immediately upon touchdown of the nose-wheel, the plane immediately turned right very sharply. I applied full left rudder and then brake, but nothing I did made any difference in control of the aircraft I have landed over 2,500 times. It ended up in the dirt on the right side of the runway.

My immediate reaction was that I had blown a tire. However, after observing the tires, I believe there was a mechanical nose-gear steering problem.

RECOMMENDATION (How could this accident/incident have been prevented?)

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

I don't have all of that information yet, but nose-wheel steering problem.
