Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Airplane sunk to the bottom of the ocean

NARRATIVE HISTORY OF FLIGHT *(Please type or print in Ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We were flying in a formation flight of 2 (I was on the wing of the other plane). We were over Half Moon Bay outside of San Francisco.

The motor stopped producing power around 3k AGL as we descended towards the coast. I tried every possible combination of things to get the motor going with no luck. I got a little power out of it when I switched tanks, but then it went dead again. There was no abnormal sound, vibration, etc. Just zero fuel flow and temps went to zero. I told Owen we were going down, I pitched for best glide, and pointed towards the shore. I told my passenger to make sure her seatbelt was tight and to prepare for impact. I would guess I had 30-40 seconds between engine out and hitting the water. I leveled off around 10ft above the water (gear and flaps up), and kept the nose up and let it settle onto the water as gently as possible. If there had been waves I would have landed parallel to them. I knew if there was any wind it was coming from the west, but I wanted to stay pointing east so I wouldn't have to deal with doing a 180. That gave me more time to focus my attention on getting the motor going.

We skipped along for a few hundred feet, there was a little splash in front of us but no real impact (horizontal or vertical). Once we came to a stop, I told her to open the door and get out onto the wing. I followed her onto the wing and then took inventory of what was in the plane that could help us out there on the water. I grabbed a booster seat cushion, my phone, an empty water bottle (with cap on), a puffy jacket, and a few reflective window shades (for floatation and to signal people). We waited on the wing while the plane began taking on water and sinking. I took a few seconds of video. When the plane was near vertical, we were left floating in the water. I would guess it took around 40-50 seconds for the plane to sink enough where we couldn't stand on the wing, and another minute or so until it was completely gone.
