Subject: Statement of incident August 25, 2019

Aircraft is Scoda Super Petrel N632 MM. This is its first flight of the day with the last previous flight occurring the day before. Aircraft was wheeled out of its hanger to the adjacent hard surface area. It was fueled after its last flight with both tanks full. Preflight consisted of a walk around and hand pulling the prop through multiple compression strokes. Passenger was seated in the right seat and briefed on emergency egress. Startup was routine after TCU (turbo contro unit) and both fuel pumps were audibly verified operational. Pumps were then turned off and engine started normally. Fuel pump was reengaged and fuel pressure, oil pressure, fuel quantity and voltage were in the green. Taxi for takeoff to the end of runway 22. Run up at 4000 rpm showed a normal drop of 200 per side. Rotax is a geared engine 2.43 to 1. Take off commenced when oil temp reached 120F. Throttle was advanced to detent which limits engine to 35 inches MP and 3500 rpm. Climb out at 80 mph netted about 800 fpm climb. We crossed the Sierra Paloma mountains about 5500 ft and started descent to KWJF. ATIS on 126.3 was not available. The engine then went to low power and was not responsive to throttle movement. Fuel selector was rotated to opposite tank and fuel shutoff was verified on. Best glide at 70 mph was established and we headed to an open field and elected to keep the gear up. Passenger called Fox tower and notified them of an emergency and that we landing in an empty field. He requested assistance. Touch down was uneventful but the slide out was very rough and bumpy. When the aircraft came to stop tower was notified we were safe on the ground with no injuries. Master and fuel valve were shut off. Both passenger and myself exited the aircraft without difficulty. About 5 minutes after touchdown a small fire was observed 150 feet away in the path of the slide out. Bystanders and passenger stomped it

out. 3 minutes after that another fire started about 75 ft away. I attempted to extinguish it with the aircraft fire extinguisher to no avail. Sheriffs were now on scene and evacuated us to the street. Fire equipment trucks and helicopter put out the fire. My mechanic was called to help recover the aircraft and after a preliminary investigation by Frank Motter of the FAA, NTSB released the aircraft for disassembly to trailer to my hanger at [REDACTED] where it now forlornly awaits a visit from the NTSB and insurance adjuster.
