Glasair (N279G) fire at (KSBD)

On June 30, 2019, about 5:00 PM, I flew Glasair (N279G) into San Bernardino (KSBD) for a personal flight. I exited runway (24) at (C) and taxied around the west ramp looking at the area. After about 20 minutes, I called ground control for taxi instructions to the active runway for takeoff. I received clearance to taxi on taxi way (E),(A) to runway (24). I then proceeded on taxi way (E),(A) to the runway (24) run-up area to do my run-up. After a successful run-up, I taxied up to and behind a Cessna waiting for departure. The Cessna departed and I called the tower requesting clearance for takeoff with left closed traffic. Tower told me to hold short for traffic. I acknowledged and held short of runway (24). The tower then cleared me for takeoff. I started to push the throttle in and the engine quit. I announced to the tower to hold on for a second because the engine quit. I did not hear the tower cancel my takeoff clearance. A few seconds later, I saw smoke coming out of the oil check door on top of the cowl. I told my passenger to get out because we were on fire. We exited the plane and backed away running on taxiway (A) waving are arms at the tower which was in plain and un-obstructed sight. It took more than 10 or 15 minute before the fire department finally came to put out the fire. N279G was destroyed.
