Subject: Flight Attendant Injury

Date: Friday, January 3, 2020 at 8:39:11 PM Pacific Standard Time

From: Jeffrey Whitman

To: Tim Prero

. January 1, 2020

. N962SS

. Flight from Las Vegas (KLAS) to Van Nuys (KVNy)

. Incident occurred between Palmdale (PMD) and the JANNY intersection. Altitude was between 12,000 and 8,000 feet.

While on the JANNY5 RNAV arrival ATC was advising aircraft of reports of moderate turbulence from 12,000 feet to the surface. We heard aircraft on the frequency verifying the existence of the turbulence.

While still in smooth air we began signaling the flight attendant (Emina Mila), via the seat belt sign/chime, to return to the cockpit/jump seat.

Numerous attempts, including use of the cabin PA, failed to get Emina's attention. I asked a passenger to tell the flight attendant to come to the cockpit immediately. Upon successful relay of the requirement, Emina started toward the cockpit.

At that time we hit momentary moderate turbulence. I saw Emina lifted into the air then fall to the floor. She did not get up. I went to the back of the aircraft to attend to her needs. She was secured into a passenger seat. I returned to the cockpit.

Upon contact with VNY tower, we requested immediate emergency medical care at the Jet Aviation ramp. We landed normally and taxied to Jet Aviation, where emergency medical services met the aircraft.

Jeff

Subject: Incident Report N962SS trip # 11996 From LAS to VNY

Date: Thursday, January 2, 2020 at 4:13:25 PM Pacific Standard Time

From: Al Amirali

To: Tim Prero

CC: Matt Saberton, Gary Reed

Details of incident on flight 11996 from LAS to VNY on January 1, 2020 during which one of the crew member (a cabin attendant) received bodily injury due to turbulence.

Tail # ===== N962SS

Trip # ===== 11996

Date ===== 01/01/2020

Departure and Time ===== KLAS 0013Z

Arrival and Time ===== KENVY 0053

Altitude and Location ===== Between 12000 to 10000 feet / Between PMD and Umber

Aircraft speed ===== 270 kts indicated

In the descend on JANNY 5 RNAV arrival around passing through 16000 feet we were informed by ATC of reports of moderate to severe turbulence, immediately we requested to passengers to fasten there seat belts and called the Cabined attendant to take her seat, we tried several times. Finally somewhere while descending between 12,000 to 10,000 feet we encountered a severe jolt which just lasted for a fraction of a second, immediately I asked the first officer to look back to check on the passengers and he infiltrated me that the cabin attendant was down and she was not getting up, I requested the first to go back and help her and secure her in a seat.

Immediately upon contact with VNY tower we informed the controller about the incident and requested emergency medical assistance, apron arrival at jet Aviation the aircraft was met by the emergency crew and the patient was transferred to the hospital.

Above is the description of the event that took place on flight 11996 from KLAS to KENVY to the best of my recollection.

Al Amirali

Captain flight 11996.
