☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to Prop, both wings, one wing strut and rudder

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed KGCC at 10:40 am MST on runway 34. I headed north and landed twice on a private ranch strip located on Middle Prong Rd. Then I departed north and landed on a family owned field near Spotted Horse, Wy to visit brother-in-law who was farming fields. After talking for a few minutes he asked to fly around the ranch. After sight-seeing for approximately 20 minutes we came back and landed on the same field again. Just before landing I had looked at a pond for wind direction and determined the wind to be calm. After landing I decided to take off again in the opposite direction from which I had landed, it being a moderate downhill slope, and with the idea that the wind was calm. After proceeding into the take-off roll I quickly noticed I wasn't building airspeed at the rate I had anticipated. Having obstacles at the far end of my intended departure path I made the decision to abort the take-off. I reduced power and applied full braking. After having slowed considerably and losing elevator authority, the tail of the plane came up and I was unable to release brakes in time to avoid nosing over. The plane nosed over onto its back and came to a full stop almost immediately. At this point both myself and my passenger, being uninjured, were able to exit the plane through the side door. After successfully exiting the plane and taking stock of the situation I noticed that we had had a substantial tailwind of approximately 10-15 knots and the wind shifted directions repeatedly during the time we stood at the accident site. The field had been freshly planted and had approximately 1 inch of loose soil on top.

Operator/Owner Safety Recommendation

I should have taxied back farther and used more of the field for take-off.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
