Subject: Re: WPR20FA008 Angel Fire, NM-Airplane Accident Witness
Date: Wednesday, October 23, 2019 5:34:41 PM

Our house sets three quarters of a mile north of the runway on Ash mountain. I saw the plane taxi going north on the taxiway. At that time the plane started departure towards the south. I watched the plane the whole time it started to take off and the whole time the plane was very unstable. The plane was going very slow on take off and was maybe 100-125 ft off of the ground when it went to the right towards the highway and maybe gained 50 ft. That was right over the highline. After that, it hit the top of the tree and Zebs. Then I saw the plane flip and then lost visual only seeing the dust and fire. If I can be of help in anyway please let me know.

Driver's License or Identification Number [REDACTED] State: KS

I was at the window watching the plane take off from the north end of the runway going to the South. I noticed the plane was very slow taking off, he was very unstable almost going into a stall. The plane was not gaining altitude at all. The plane used most of the runway taking off. It looked like the plane was going to turn back but at that point the plane hit the tree top and the building, this is when I saw the smoke.
