

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Kim Davidson Aviation at KSMO State: CA
 ZIP: 90405 Country: USA
 Latitude: 34.02 n Longitude: 118.45 w
(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 12/27/2019 Local Time: 11:49am
mm/dd/yyyy Time Zone: Pacific

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N52CV
 Manufacturer: Cirrus Design Corporation
 Model: SF50 Vision Jet
 Serial Number: 010
 Year of Manufacture: 2017
 Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☒ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

Maximum Gross Weight: 6,000 lbs
 Weight at Time of Accident/Incident: 5,070 lbs
 Number of Seats: 4 Flight Crew Seats: 2
 Cabin Crew Seats: 0 Passenger Seats: 2
 Number of Engines: 1

Category of Aircraft
☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate
(Check all that apply)
Standard
☒ Normal
☐ Aerobatic
☐ Balloon
☐ Commuter
☐ Transport
☐ Utility
☐ Certificate of Authorization or Waiver (COA)
☐ None
Special
☐ Restricted
☐ Limited
☐ Provisional
☐ Special Flight
☐ Experimental
☐ Special Light-Sport
☐ Experimental Light-Sport
☐ Unknown

☒ Annual
☐ Conditional (Amateur-built only)
☐ Manufacturer's Inspection Program
☐ Other Approved Inspection Program (AAIP)
☐ Continuous Airworthiness
 Other, specify: _____

Description of Fire Extinguishing System

☐ None
☒ Specify: Manual fire extinguisher and Engine fire suppression system

Propeller 1

☐ Fixed Pitch
☐ Controllable Pitch
☐ Ground Adjustable

Manufacturer: _____
 Model: _____

ELT Installed: ☒ Yes ☐ No

If Yes:
 ELT Manufacturer: Kannad
 Model or Part No.: _____
 TSO No.: ☐ C91 (121.5 MHz) ☐ C91a (121.5 MHz)
☐ C126 (406 MHz)

Was ELT still mounted in aircraft? ☒ Yes ☐ No
 Was ELT still connected to antenna? ☒ Yes ☐ No
 Did ELT Activate? ☒ Yes ☐ No

If activated:
 Did ELT Aid in Locating Aircraft: ☐ Yes ☒ No

If not activated:

Indicate Reason: ☐ Impact Damage
☐ Fire Damage
☐ Battery Expired/Damaged
☐ Unknown

Propeller 2

☐ Fixed Pitch
☐ Controllable Pitch
☐ Ground Adjustable

Manufacturer: _____
 Model: _____

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Cabin Fire resulting in complete fuselage/aircraft damage, engine seemingly unaffected

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

IFR flight planned (in VMC conditions) for approximately 12:15pm on 12/27/2019. Weather was clear at KSMO and along planned route to KCRQ.

I arrived at the airport at approximately 11:35am for the flight, my Cirrus SF50 (Tail: N52CV, S/N: 010) was tied down at Kim Davidson Aviation on the South side of the Santa Monica airport. Upon approaching the airplane I checked the level of fuel and outside condition then opened the main cabin door. I proceeded to perform the in-plane preflight checklist items (circuit breakers, AP servos, oxygen, voltage, etc.) with Bat 2 and Bat 1 turned on in succession. I performed a Pitot-heat check and also a check of the external lights.

After turning off all but the Master Oxygen, I went through the external pre-flight checklist and walk-around. Plane was determined to be in good condition so I removed the chocks, loaded up my dog in the rear of the cabin (behind the 2nd row of seats) and sat in the left-hand pilot seat. I closed the cabin door and turned on Bat 2/1 and Gen 1/2 as per the checklist. I executed the pre-Engine Startup checklist items and performed the Engine Startup.

N2 achieved positive rotation, then N1 within 25% of N2, ITT light off and then stabilization for a successful engine start. Once running I noticed a very faint smell of smoke, I checked again the engine temperatures and any CAS messages (all normal), I also cycled the Climate Control System (using the ECS disable), and the Fresh/Bleed air option on the main console. The faint smell dissipated. I continued to go through my checklist, collecting ATIS information and beginning to set up the Avionics for my planned flight route, but keeping the data point of the smoke smell in my mind and considering a go/no-go decision.

Prior to calling for Clearance I noticed a very slight opacity (~10%) in a beam of light that was running left to right at my knee level within the cockpit. Although faint, together with the smoke smell at startup, I considered this to be the second sign that something was off with the aircraft. I decided that I may not be taking a flight (70% no-go) but at the minimum I would shut-down and consult with the mechanics at Kim Davidson.

I brought up the Before Shutdown checklist on the PFD and shut down the engine and avionics completely. I took a picture of the beam of light to aid with diagnosis by Kim Davidson (11:49am). I exited the plane via the main cabin door and called for a mechanic (Shane Wilson of Kim Davidson) to come over and check the plane out. As his colleagues located him and he began to come out I continued to visually inspect the cabin. I noticed very small tendrils of smoke coming from the trim panels located on the right side of the cabin behind the co-pilot seat and in front of the passenger seat. As the mechanic walked out I noticed more smoke and called for him to bring a fire-extinguisher. I removed my dog from the aircraft and the staff at Kim Davidson arrived (11:52am). More smoke was coming from the trim almost completely obscuring that passenger seat, but no visible fire yet. Kim Davidson personnel called 911.

Aiming at the smoke, Kim Davidson personnel emptied two fire extinguishers hoping to arrest any fire. Their efforts, however, seemed to have no positive effect and were hampered by not being able to see the fire due to the trim, the smoke and the extinguisher spray.

At approximately 11:55am I saw the first orange, visible indications of flame and heard the crackling of active fire. Given the jet fuel and parachute system on board we removed ourselves further from the aircraft to await emergency services (11:57am). Kim Davidson personnel used their tug to pull another airplane out of harm's way.

At 12:02pm Santa Monica FD trucks arrived and extinguished the fire with the truck-mounted water cannon. I remained on site for approximately 3-4 hours answering questions (on site and via telephone) from FD, PD, Santa Monica Airport, FAA, NTSB and the manufacturer. Kim Davidson received permission to move the plane into its hanger and did so. Additionally, they shut off the ELT which had armed, I spoke with the personnel at the ELT center to indicate that no location or further emergency services were required. I would return on the morning of 12/29/19 to be interviewed by the NTSB and FAA and to assist with the investigation before being dismissed.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

Assuming the cause of the fire was electrical, determine the cause of the fire and fix part/wiring/harness, install fuses and breakers which prevent runaway voltage from resulting in fire. Warning systems to indicate if a system does begin to short or catch fire. Review of full systems to identify weaknesses.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Possible electrical fire
