As part of our operating procedures for testing fuel, we take a sample of both Avgas and Jet A fuel each morning to assure that our fuel is clean and dry. All employees at our facility have received training from our fuel supplier Avfuel Corporation. On Monday, January 20, 2020, at approximately 8:48 a.m. Line Service Tech Kenneth Jacobs took a sample of Avgas 100LL and performed an inspection and found the fuel to be clean and dry. A total of 12 aircraft were fueled on January 20, 2020, which equals 320.75 gallons sold.

Please let me know if you need any additional information.
