Hello I am not sure that the plane I saw is the one in question but the timeline seems right and I've had man [REDACTED] that I should contact you about what I saw.

I live at [REDACTED] Rd, Meadow Vista, CA 95722. Today Friday January 24th at approximately 9:50 I went into my back yard and saw a small plane flying low and appearing to have engine trouble. I stayed and watched it as long as I could until I could no longer see or hear it. While flying over my property it sounded as if the engine failed and restarted many times, and just as it was getting too far behind the trees to track it seemed to not restart. I assumed that even with engine failure this close to the airport they would be able to make it back as that is the direction they were heading, I am sorry that I was so wrong.

If for any reason [REDACTED] ed to be contacted about this please respond to this email or you can contact me at [REDACTED]

Thank you

David Nootenboom

Small plane crash on 1/24/20 at ~9:50 am near Meadow Vista California

This morning at about 9:50 am I heard a very loud aircraft fly over my house in Meadow Vista California. I went outside to see what all the noise was. I saw a small plane turning back towards the Auburn airport with the engine roaring and rumbling. The motor started backfiring with at least six loud bangs over about a 30 to 60 second time period and then I heard the motor stop running. I said to my spouse "that plane is probably going to crash". Sure enough, later we saw the crash reported on the local news KCRA.
