Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to control system.
Tail-boom Broke off.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

- Started pulling to level during aerobatics and heard a thud at which point I wanted to establish a safe attitude. While I was pulling I felt severe vibrations on the stick and guessed something came loose or broke. Contemplated bailing out and popping the chute but realized I had sufficient control to level the plane and assess the damage if any.
- Assessing the damage, I looked at both wings to see that the right spoiler was out. I thought the spoilers popped open, so turned to the left side and saw that it was inside the wing with my spoiler handle front and locked.
- It is when we started flying towards the airport that we realized we had only about 10-20% elevator control.
- We decided to land on the runway 17R at AZ67 into the wind and started to make our way to it.
- We had a lot to altitude to burn as we were closing in on the final so decided to do some S-turns and circles with whatever control we had so as to make the glider touch down in the bushes that line the beginning of the 17R on the South side in order to soften the impact and minimize the damage.
- On the final we hit an extremely strong sink and with one spoiler stuck and lack of complete elevator control had to touchdown in the open area in front of us.
- It was a hard landing with the main and nose wheel taking the impact.
- No serious injuries but a damaged glider.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Better design of control system linkages, particularly the spoilers.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Control System: Spoiler and Elevator.
