

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Payson State: AZ

ZIP: 85541 Country: Gila County

Latitude: 34.1598 Longitude: -111.7274

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 10/24/2019 Local Time: 16:00
mm/dd/yyyy

Time Zone: Pacific

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N8326Z

Manufacturer: Cessna

Model: 210-5A (205A)

Serial Number: 205-0326

Year of Manufacture: 1963

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

- ☒ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

Maximum Gross Weight: 3300 lbs

Weight at Time of Accident/Incident: 2900 lbs

Number of Seats: 6 Flight Crew Seats: 2

Cabin Crew Seats: 2 Passenger Seats: 2

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☒ Normal
☐ Aerobatic
☐ Balloon
☐ Commuter
☐ Transport
☐ Utility

Special

- ☐ Restricted
☐ Limited
☐ Provisional
☐ Special Flight
☐ Experimental
☐ Special Light-Sport
☐ Experimental Light-Sport

- ☐ Certificate of Authorization or Waiver (COA)
☒ None ☐ Unknown

Landing Gear

(Check all that apply)

☐ Retractable

- ☒ Tricycle ☐ Tailwheel
☐ Amphibian ☐ High Skid
☐ Emergency Float ☐ Skid
☐ Float ☐ Ski
☐ Hull ☐ Ski/Wheel
☐ Other Launch/Recovery System
☐ None ☐ Unknown

Engine Type (Select one)

- ☒ Reciprocating ☐ Liquid Rocket
☐ Turbo Shaft ☐ Solid Rocket
☐ Turbo Prop ☐ Hybrid Rocket
☐ Turbo Jet ☐ None
☐ Turbo Fan ☐ Unknown
☐ Electric

Fuel System Type (Reciprocating)

- ☐ Carburetor ☒ Fuel-Injected

Engine	Engine Manufacturer	Engine Model/Series	Manufacturer's Serial Number	Date of Mfg. mm/dd/yyyy	Rated Power ☒ Horsepower or ☐ lbs of Thrust	Total Time (hours)	Time Since: Inspection (hours)	Overhaul (hours)
Eng. 1	Continental	IO-550			300	550		
Eng. 2								
Eng. 3								
Eng. 4								

Last Inspection Type

- ☐ 100-Hour ☐ Continuous Airworthiness
☐ AAIP ☐ Conditional Inspection
☒ Annual ☐ Unknown

Date Last Inspection: 07/01/2019
mm/dd/yyyy

Airframe Total Time: 4420.78 hrs

hours measured at (Select one)

- ☒ Last Inspection ☐ Time of Accident/Incident

Type of Maintenance Program (Select one)

- ☒ Annual
☐ Conditional (Amateur-built only)
☐ Manufacturer's Inspection Program
☐ Other Approved Inspection Program (AAIP)
☐ Continuous Airworthiness
☐ Other, specify: _____

Description of Fire Extinguishing System

- ☐ None
☒ Specify: handheld fire extinguisher
located under pilot seat

Propeller 1

- ☐ Fixed Pitch
☒ Controllable Pitch
☐ Ground Adjustable

Manufacturer: McCauley

Model: PHC-C3YF-IRF

Propeller 2

- ☐ Fixed Pitch
☐ Controllable Pitch
☐ Ground Adjustable

Manufacturer: _____

Model: _____

ELT Installed: ☒ Yes ☐ No

If Yes:

ELT Manufacturer: dont have info

Model or Part No.: dont have info

TSO No.: ☒ C91 (121.5 MHz) ☐ C91a (121.5 MHz)
☐ C126 (406 MHz)

Was ELT still mounted in aircraft? ☒ Yes ☐ No

Was ELT still connected to antenna? ☒ Yes ☐ No

Did ELT Activate? ☒ Yes ☐ No

If activated:

Did ELT Aid in Locating Aircraft? ☒ Yes ☐ No

If not activated:

- Indicate Reason: ☐ Impact Damage
☐ Fire Damage
☐ Battery Expired/Damaged
☐ Unknown

Additional Equipment (Check all that apply)

- ☐ ADS-B
☐ Airframe Parachute
☐ Angle of Attack Indicator
☒ Autopilot
☐ Data Recorder
☒ Electronic Flight Bag or Handheld Device
☐ Electronic Multifunction Display
☐ Electronic Primary Flight Display
☒ Handheld GPS
☐ Heads Up Display
☒ Onboard Weather
☒ Satellite Tracking Device
☒ Stall Warning System
☐ Video Recording Device
☐ Other, Specify: _____

OWNER/OPERATOR INFORMATION**Registered Aircraft Owner**Name: Skyhawks, Inc.City: LongmontFractional Ownership Aircraft: ☐ Yes ☒ NoState: Colorado ZIP: 80504Country: Boulder County**Operator of Aircraft**☐ Same As Registered Owner☒ Same Address as Registered OwnerName: Stig Ravdal

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Spinner damaged, left and right wing sustained damage to leading edges and tips. Nose wheel broke off. Right stabilizer and elevator broke off. Rear fuselage was severely bent and crumpled.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

We departed KBJC at 10:15 am local time destination KPAN. We were 3 adult males and camping gear and food for 2 days camping. We arrived in Payson around 1:15 which was our intended lunch and fuel stop. We went into town to have lunch, pickup some local flies for fishing. It was a bit windy on our arrival. After lunch and stop at Walmart we went back to the airport, added approximately 40 gallons of fuel (we had flown about 4 hours from KBJC and for planning I estimate 15 gph and the tanks hold 78 usable), I didn't want to be low on fuel on a remote airstrip. However, in hindsight it would have made sense to only take on an hours worth of fuel to keep the plane light and instead return to KPAN or some other airport for fuel the next day. We departed Payson, AZ approximately 15:40-45 local time for a short flight (10 min) to Red Creek airstrip due S-S.W. of Payson and on the Verde River. Upon reaching the airstrip I approached from the N. NW and overflew the runway to get a good look at the surface and windsock. The windsock indicated a crosswind condition almost directly perpendicular to the runway and coming from the N-NW direction. Winds were light and slightly variable. Windsock was half full half hanging down and I estimate winds varied between 4 to 9 knots. After overflying the runway I made an approach to land from the N.E. but came in too high and I decided to go around and setup for landing again. On the second attempt the approach looked great and my energy was low indicated by the stall horn going off as I approached the threshold. I estimate that I touched down about 100-150 feet from the end of the runway and immediately executed hard braking due to the short runway. However, within a second or so we became airborne again although not because the plane bounced upon landing. It felt like the runway had a dip or depression in it, but I don't believe that was the case and I suspect that the wind had changed slightly and I had a tailwind or the wind spilling over the side created the condition (the strip is up on a mesa of sorts). The runway is short (1200') and I knew at that point that i would not be able to stop before exceeding the runway length. There is a wash/shallow ravine at the West end of the runway and I knew it would be bad to overshoot the runway and end up in the wash. I executed an aborted landing by pushing the throttle to full forward. I remained in ground effect until I reached the end of the runway at which point I started to pull back on the yolk to climb. I don't believe I was able to pull up the flaps from their full flaps (40) position. The terrain to the West rises and it became apparent very quickly that we would not be able to out climb the terrain. Rather than attempt to turn the plane away from the rising terrain at low altitude and speed or to pull up and stall, I decided to fly the plane until it would fly no more. Approximately 500' beyond the end of the runway we began to encounter bushes and cactus and within what seemed like an instant we impacted the ground. The plane proceeded to flip over on its back and all forward momentum stopped. From google maps I estimated the plane was 700' from the end of the runway and up the hill. At this point myself and my two passengers were suspended upside down in our shoulder harnesses. I called their names and said to get out of the plane, fearing a fire could erupt at any time. We were out of the plane within 15-20 seconds of coming to a stop. We moved away from the plane in case it caught fire. After we determine there was not an immediate danger of fire, we proceeded to retrieve my survival bag and some of the gear we brought to camp with. At about this time I activated the personal locator beacon I carry on my person on all back-country flights. I believe the time of the accident was 16:00 local time. After retrieving some more gear we got most of the rest of the gear, handheld radio and at this point I remembered to turn off the ignition, master and radios. After some time staying near the wreckage, the sun started setting and we proceeded to relocate our gear to the airstrip before it became dark. From there we decided to move again to the middle of the airstrip where there is a campsite and fire pit. As it was getting dark, I believed that rescue would be put off until the following day and we proceeded to pitch our tents, make a fire and prepare for the night. Approximately an hour or so after dark we heard a helicopter in the distance (to the N.West) and we saw it appear and disappear behind a ridge. It looked like it was executing a search pattern. With my handheld radio I would communicate mayday-mayday-mayday on 121.5 every time a plane flew overhead and whenever we saw the helicopter appear over the ridge. We were unable to communicate with anyone but we would hear the ELT on 121.5. I also tried other channels including 122.8, 122.9, 123.45, and some of the approach channels for the area. We were unable to communicate with anyone on the radio. Whenever the helicopter would come into view I would also click the radio S-O-S in morse code. After maybe 1.5 hours, the helicopter came to our side of the ridge (approximately the S. E. side of the ridge), at that point we saw the helicopter fly towards us and when it came closer it made a bee-line to the aircraft wreck. The AZ state police rescue that arrived told us once they came into our valley they heard teh ELT and homed in on the aircraft. After circling the aircraft the heliopter landed on the runway and and EMT came out to talk to us. We were airlifted from the airstrip to a rendezvous point near Agua National Monument where the Sheriff from Prescott Valley Sheriff SAR team who was coordinating the rescue, retrieved us and our belonging and took us into Prescott.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

In hindsight, we could have opted for a lighter load. The plane has great useful load and we took advantage of that and brought more food, drink and gear than we would have absolutely needed. While not overloaded we were not as light as we could have been. Additionally, taking on 50% of fuel in KPAN added more weight to the plane when a smaller amount and a trip back to Payson on the flight out would have further lightened the load. Having made many backcountry trips in the plane, one contributing factor was complacency about the weight. The plane performs very well at 75% or even max gross and unlike some of my earliest back-country flights I was not as concerned about the weight. Furthermore, this was an unfamiliar airstrip and I had not done sufficient research into it. I had reviewed the length, elevations, direction and other factors which is usual for this kind of flying. I knew the strip had a 13 degree rise to the West and that the terrain rose further. It is known as a one way in and one way out strip. What I had missed in my research was the number of accidents that have occurred there and it may have caused me to choose another destination altogether. The other lesson I have pondered is if I had made a little more detailed plan B (it consisted of Pleasant Valley, GrapeVine and Payson as the last backup), I may have opted for the plan B upon encountering wind at a short airstrip.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)**Was there Mechanical Malfunction/Failure?** ☐ Yes ☒ No*(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)***Total Time/Cycles
