Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Full extent unknown pending inspection, but at least:
N343TH (Ercoupe) Both wings damaged and at least 1 center section (wing root), left vertical stab.
 + rudder are off, prop tip bent, small dents in nose bowl.
Cessna N7265P: R wing strut broken, + unknown damage to R wing.
Piper N1033X: Substantial damage to both sides of fuselage forward of the wings.

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

While practicing touch-&-go landings, completed 2 successfully. After take-off for the 3rd, at about 3/4 way down Rwy 29 R and ~200' altitude, engine began faltering in a rhythmic pattern. We were too low to turn back or to make any off-airport flat area, but I was able to make a 90° left turn + land on Taxiway Bravo, which is perpendicular to Rwy. 29 R, at the west end of 29 R — so that is where I put it down. Unfortunately, despite braking hard, the momentum + speed after touchdown were too much to avoid a bump on the taxiway which pulled us slightly left + we clipped the wing strut of Cessna parked at the south end of where Bravo meets the ramp (near ^{intersection with} Alpha). That spun us toward the left and ^{the} right wing of my Ercoupe hit the left side of a Piper parked across the way. That impact then spun us so that my ~~right~~ left wing then hit the right side of the ^{same} Piper.

Apparently a bystander caught part of this on video + it can be seen at this URL: <https://www.youtube.com/watch?v=2KcWld65-1c&feature=youtu.be>

[One note: odd angle of video makes it look like a 180 degree turn, but it was only 90 degrees to land.

Neither of us were injured. We climbed out + the f.d. personnel checked us out.

Operator/Owner Safety Recommendation

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
