Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft was destroyed by the crash and post crash fire. Damage to one tree was minimal caused by the post crash fire.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I had finished working on the alternator failure lights, they had not been working. I ground ran the engines to check if the alternator failure lights worked, they did. I decided to check them out in flight before I signed off on the issue. I taxied out, did my run up, finished the checklist, announced my intentions on unicom, and added full power, held the brakes to make a short field takeoff. My starting takeoff position was left of the centerline so I corrected the heading to get back on centerline. When I was on centerline turned the aircraft with rudder to get back to runway heading. The aircraft kept turning to the left, at this time I was at 80 kts so I rotated to a takeoff attitude, I tried to apply right rudder. It would not move. I noticed that my left shoe was somehow stuck between the rudder pedals. I was still turning to the left, so I pulled the right engine power back to around climb power and to keep the aircraft from slipping and to stop the turn. I added left rudder which freed my foot. At this time I was pointed about 30 degrees left of the runway heading and looking at an oak tree. I pulled back on the yoke to try and clear the tree. The last thing I remember about the takeoff was seeing the branches of the tree still above. The next thing I remember was waking up in the life flight helicopter. I do not remember if I added power to the right engine or not.

RECOMMENDATION (How could this accident/incident have been prevented?)
