DAMAGE TO AIRCRAFT AND OTHER PROPERTY**Aircraft Damage**

- ☐ None ☒ Substantial
☐ Minor ☐ Destroyed
 ☐ Unknown

Aircraft Fire

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Both Wings separated from fuselage. Plane rolled over 360 degrees on the ground. Communication antenna broke

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

I landed at Los Alamos (LAM) at around 12:45 local time. While on landing roll RWY 27 the engine stopped and I presumed at the time that it was due to the 8500 density altitude. I turned the engine back on and taxied to the fuel island where I topped off fuel (75 gallons). I then took off from LAM RWY 9 heading VFR in the direction of 060-070. About 20-25 min in flight I was doing VFR s-turn climbs to avoid terrain. I believe I was around 11000 feet when the engine sputtered. I shoved everything in full (mixture, prop, throttle) and tried to turn right as it was clear of terrain, the stall warning came on, and I dropped the nose. I immediately made the decision to put the plane down. I found a patch of terrain covered in snow and decided to land the plane there to avoid potential fire. On impact the left wing separated from the fuselage and the plane came to a stop. After it came to a stop a I reached to the right to open passenger door, due to the weight shift and slope that was to the right, suddenly the airplane started a 360 roll which broke off the right wing. After the plane came to another stop I turned off the master switch. I tried to open the door and exited the airplane and entered snow up to my thighs. The ELT was on due to impact. I had lost my reading glasses and could not read my phone. After exiting the aircraft I went back in to confirm ELT and turned it to on position and confirmed on 121.5. I called a few times with Mayday messages but with no success. Later on I realized that the communication antenna on top of the airplane was broken, probably due to the roll. My telephone had no reception, I struggled up the mountain about 400 or so feet and I send my position from my apple phone using WhatsApp to a few students/pilots/friends to call FAA/911/and authorities. I was there for about 5 hours before a national guard Blackhawk found me. As I understood later on, the ELT was not transmitting signal and I'm sure it's due to the wire being disconnected from unit or antenna. I believe if I had Kannad ELT Integra, which contains internal GPS antenna, Search and Rescue would have found me quicker.

Search and Rescue airlifted me to Albuquerque Airport (ABQ) and initially I refuse ambulance and Hopsital, but after 2 hours of pain and dizziness, I thought it was better to go to the Hospital. I took an Uber to Presbyterian Hospital.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
