NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I started the day with my walk-around of the aircraft and preflight of the day. I calculated my fuel burn for the day at 6.5 gal/hr and was planning on landing for fuel around 12pm (Arizona time). I visually checked the fuel and sumped it, I did not notice any particles in the fuel. I started the engine at 6:56, contacted and received clearance for aerial survey work about 9 miles north of Davis AFB and proceeded to get taxi clearance to the 11L. Performed run-up, all systems were reporting green, fuel tanks reading full in the gauges and fuel selector on both. I took off at around 7:10 and proceeded to A-Mtn then on course to start my first line. At the start of the line I checked gauges and let ATC know I was on-station. I proceeded to fly east-west lines for 3.5 hrs and noticed the engine sputtering. I double checked my fuel selector, it was on both, enriched the mixture, checked the magnetos and looked at the gauges. My left tank was reading empty and my right was reading full. I proceeded to contact ATC, declared emergency, and squawked 7700. I turned right immediately to avoid flying further into terrain and attempted to restart the engine. There was no favorable result, so I continued to prepare for an emergency landing which included following the emergency checklist items for a forced landing. I noticed with the thermals in the area I was continuously receiving downdrafts which limited my glide range. I found the straightest road near me that had little traffic on it and proceeded into a left downwind. On final, I was assured landing so I set flaps to 10 but then received another downdraft. I made do with a shorter landing than planned and landed the aircraft to the best of my ability. No injuries were observed on myself but the aircraft had sustained damage from impacting foliage. I then secured the aircraft.
