Hi Andrew,

There mechanic disassembled the brakes the FAA was not present Amador sent the pictures. I did see the aircraft a couple of days after the incident. The right brake reservoir was empty but I could not find any external leak.

Thanks Roger,

I have the pilot statement and -23, but could you send the examination notes? The brakes were disassembled in a photo, I just don't know who took them and what they found?

Talk soon.

Andrew,

Sorry I thought we were done with that one.

Roger,

You sent the wrong accident information. This (WPR20LA172) N2245S was the one from Imperial County Airport part 137, pilot claimed the brake wasn't functioning and the airplane turned left on landing. Wing damage.

I have photos of the pads displayed out. See attached.
