The 2000 pounds I told you was rounded up. The actual weight is approximately 1000lbs. The boom gates are 510lbs, there are two antennas per boom gate that weight 100lbs each, and 200 pounds for RRHs and other miscellaneous equipment. That puts us just under 1000lbs total.

Thank you,

Joseph Payton Sr.

Subject: RE: P-197144/ Pioche, NV

I attached the new equipment weights.

Existing weights

Sector 1:

- 1 antenna @ 70lbs
- 1 antenna @ 20lbs
- Sector Frame @ 150lbs
- 2 RRHs @ 70lbs each

Sector 2 and 3:

- 1 antenna @ 70lbs
- 2 RRHs @ 70lbs each
- Sector frame @ 150lbs

I researched the existing part numbers to come up with the weights.

Thank you,

[REDACTED]

Joseph Payton Sr.
