

8/16/20

Yesterday I fueled A piper Cub
at around 9:15 - 9:30 AM... The pilot
had walked up to me while I
fueling another plane for another
Hanger. They politely asked me to fuel
their plane at Hanger 71. When I
showed up for fueling at Hanger 71
The pilot and passenger seemed very
joyous and excited. They asked me
to put ~~fuel~~ 25 gallons in the
left wing and nothing in the other side.
25 gallon topped off the left
wing. but I do not know how much
fuel was in the Right wing.
I Didn't feel that anything
was off. It was a normal fueling.
