Interview #1 Summary

Dallas Denton Dowell
Witness

Interview Date; September 21, 2020

According to a witness, the airplane began a ground roll to the south into the wind. The airplane lifted off the ground about midfield and immediately transitioned into a climb. As it reached about 100 ft above ground level, the airplane rolled to the right until it was inverted and then disappeared from the witness' view. The witness reported that the engine sounded smooth and continuous during the accident flight.
