NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

Departed KHII at approximately 1300 PST for 49X. Upon approach to runway 16 numbers while slowing air speed the aircraft began rotating to the right despite full application of left pedal. I attempted to gain forward air speed but the helicopter continued to spin clockwise. I attempted to roll the throttle down but with little altitude above the ground as I attempted to set down the left skids caught in a bush and the helicopter rolled onto it's left side in soft terrain with numerous shrubs abundant. All components of the helicopter remained intact at the point of the rollover.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

More conservative personal wind gust limitations in the airframe
