Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Wing and belly damage due to impact with trees

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On September 13, 2020 at approximately 1015 AM local time 52700 Departed Thomas Creek Airport (2U8) Headed to KLLJ with 3 to 4 miles visibility due to the smoke from surrounding fires. The visibility was not as good as expected when airborne which made it very hard to see to surrounding mountains. Climbing at 500fpm everything was going fine. At about 1025 I made a right turn to remain in the canyon when the canyon to the left was the one that I had come in the day before. Realizing the mistake I made I immediately tried to figure out a way to do a 180 degree turn to get out of the canyon. Now i was at getting 300fpm 200 at best and not seeing anywhere to turn around. I Then realized the terrain was rising faster than the aircraft could. I added trim to keep the climb but this was not Happening. I noticed a saddle to in the mountain to the east and thought for a sec I could head that way and escape. Now getting 0 to 50fpm I started to make a left hand turn towards the escape route and the left wing Immediately stalled and the aircraft a spun to the left feeling like a roller coaster I felt I had lost control. I left off of all controls and after about a half of a rotation was able to regain control. My immediate thought was get airspeed and maintain control. Within seconds we were headed for trees so I put the aircraft in straight and level flight slowing as much as possible before impact. These trees were in all dead due to a wildfire years before so we broke though many trees before coming to a stop at 44°38'32"N -114° 51 '6W. at an elevation of about 7900ft msl. The aircraft remained intact with the exception of wingtips and landing gear missing. The approximate heading was 160 degrees. I then shut off fuel supply and exited the aircraft.
