

Joshua Cawthra
Senior Aviation Accident Investigator
Aviation – Western Pacific Region

Date: March 10, 2022

Subject: WPR21FA025 – Record of Conversation

Contact: Violetta Caballero – Mother of the passenger

During a telephone conversation, Ms. Caballero reported that her daughter told her that the pilot took his girlfriend flying and “did a turn, with his girlfriend” and it “freaked her out.” Ms. Caballero stated that the pilot also told her daughter “when I take you up again, we’re going to do that” and that the accident flight happened the next time she went flying with the pilot. Ms. Caballero recalled that about 1 to 2 weeks prior to the accident, the pilot had taken his girlfriend flying and did the “trick” or “twist.” She added that she did not talk to the pilot about this directly.

Ms. Caballero further recalled that when the pilot got the airplane just over a year prior to the accident, she wasn’t comfortable with him taking her daughter in it.
